

Instruction Sheet No. 6: Terms and Conditions of Delivery of REMONDIS SAVA GmbH

Liquid waste

In advance of each delivery a detailed waste description in English or German language has to be provided (current analysis, safety data sheet). Likewise, a representative sample of the waste may be submitted. **Please contact us in case of deviations from the conditions specified herein!**

Consistency of the waste: liquid (viscosity < 190 cps (resp. mPas))

Possible delivery systems:

- _ Tanker or vacuum tanker with a connection for gas displacement

Delivery Conditions (please contact us in case of deviations):

- _ The temperature of the liquid waste must be lower than 30 °C
- _ Mercury < 3 ppm (or mg/kg)
- _ Organically bound silicon < 0.5 %
- _ Phosphorus < 1.0 %
- _ Fluorine < 0.1 %
- _ The waste must be unrestrictedly pumpable, no solid agglomerates or foreign materials such as rags, wood, foils or similarly coarse impurities
- _ Max. contents: 2 % sludge, 2 % dissolved solids, 1 % suspended solids
- _ Max. particle size: 2 mm
- _ Extremely low boiling liquids and liquids that have a high content of dissolved substances might necessitate the acceptance according to the Instruction Sheets No. 8a and 8b. These deliveries have to be registered separately and scheduled in advance.
- _ pH value > 4: Waste with a lower pH value than 5 requires the prior registration at REMONDIS SAVA GmbH, since the acceptance via the special batch station (Instruction Sheet No. 8b) might be necessitated
- _ PCB content < 50 ppm (for PCB contents > 50 ppm Instruction Sheet No. 8a applies)

Excluded from the acceptance in the tank farm are:

- _ Reactive liquids
- _ Peroxides and self-reactive substances
- _ Substances that polymerize, oligomerize or polycondensate
- _ Substances that tend to flocculate or experience a strong increase in viscosity upon temperature drop
- _ Solutes that develop gases upon change in the pH value (e. g. cyanides → HCN, sulphides → H₂S)

Completely excluded from the acceptance and not permitted are gaseous, explosive and radioactive substances, likewise chemical and biological warfare agents, genetically modified materials, as well as asbestos and carbon fibre reinforced plastics.
